# TRANSFERABLE SKILLS TRAINING

*Young Person Programmes*

Best Vocational Training Provider  
UK Global Awards  
2022

**Learners aged 16 – 18, or 18+ with an EHCP**

We offer a wide range of specialist courses in construction, animal care, land-based activities, or independent living skills. All students will be enrolled onto an individualised study programme which is a tailor-made programme of employability skill development (core qualification and functional skills), learning opportunities (work experience) and a diverse range of 'enrichment' activities. Their individual package will help them develop and grow as an individual, so that they achieve their full potential.

TST has a rolling programme of education and training so that students can engage with us at any point during an academic year, or whatever stage of student life they are at. We will help them make the transition from school to college and support them with their first steps towards a chosen career, or whatever their next step may be.

TST offers bespoke vocational education and training with wrap around care, advice, guidance and support. A good support network can make all the difference and we firmly believe that if you enjoy what you are doing then you are more likely to succeed.

A study programme comprises of three elements:

**Core qualifications:**

Nationally recognised qualifications through OCN London.

We provide full training and assessment for a wide range of qualifications (construction, animal care, land-based activities, or independent living skills) Entry Levels 1-3 and Levels 1 and 2, all of which incorporate employability skills to help them proceed onto further education, training or employment.

**Functional Skills (Maths and English):**

Nationally recognised qualifications through NOCN. Functional Skills are applied qualifications which enable students to demonstrate real-life skills in English and Mathematics. Students demonstrate the skills through real-life assessments set in everyday contexts.

**Work Experience:**

During their time with us, students will participate in work-based learning through work experience sessions (onsite and offsite community projects) to develop new skills that can be taken forward into an apprenticeship, further education, or employment.

**Enrichment:**

These sessions work on improving students' personal and social skills development or independent living skills.

**Outreach Provision:**

Students will be given the opportunities to develop and apply social interaction skills and life skills across a range of contexts to support/increase confidence and independence within the community.

**Free Taster Days:**

Students are welcome to try a course before they apply, our taster days give them a chance to get a taste of what college is really like, by meeting our expert teaching staff, experience real course activities and meet other potential students, so there are familiar faces when they enrol.
